

GONZAGA UNIVERSITY COUNSELOR EDUCATION

PEER REVIEW WORKSHOP OPPORTUNITY EDCE 900: PEER REVIEW FOR SCHOOL COUNSELORS

Peer review exists when a person in the profession of counseling who is seasoned in experience, knowledge, and wisdom examines the work of another as a colleague. The relationship is not hierarchical. Rather, the review is a means of observation aimed toward providing feedback to enhance the professional development of the person reviewed.

The Peer Review Workshop is a workshop designed to provide an opportunity for school counselors to further their professional development in supporting student achievement by demonstrating competency, effectiveness and accountability through the use of needs assessment, program development, implementation, and outcome measurement. It is a project-based experience where participants choose their own area of emphasis based on the needs of the schools they serve.

This workshop is offered according to state regulation (WAC 180-78A-005) for peer review as a requirement for obtaining Continuing Educational Staff Associate Certification.

Workshop Objectives:

- To allow for peer review and the exchange of ideas
- To utilize research based best practices
- To utilize the American School Counseling Association National Model framework for developing school counseling programs
- To relate program development outcomes to student achievement

More Information 

Two Convenient Locations for Phases 1 and 2 of the Workshop
Phase 3: Complete the Project FROM YOUR HOME and WORK SITE!
